Having spring rates and ride heights which are too low will cause a lot of problems with the whole suspension, handling and aerodynamics of the car. This is one of the real reasons that we need to know the wheel rates, in order to get compliant suspension system which maximise the tyre contact patch with the road.

Car Suspension Tuning Guide | Rapid-Racer.com.

The job of a car suspension is to maximize the friction between the tires and the road surface, to provide steering stability with good handling and to ensure the comfort of the passengers. In this article, we'll explore how car suspensions work, how they've evolved over the years and where the design of suspensions is headed in the future.
