Concrete Filled Metal Pan Stair

Description Pacific Stair Corporation's 100 Series Concrete Filled Stair System is our most affordable standard stair system. These stairs are intended for use in conjunction with our Concrete Filled Landings. The pans are

Access Free Concrete Filled Metal Pan Stair Details Guide

built to be filled with concrete after they are installed, thus creating an attractive and long-wearing surface.

Concrete Filled Stairs & Landings | Pacific Stair Corporation

Our Stairpans are square. Stairpans are used in commercial steel stair construction to hold poured concrete for safe and durable walkways that

provide strong support.

With decades of
experience

manufacturing steel
stairpans for the
commercial building
industry, you can trust
that Eberl Stairpans
are manufactured out
of highest quality sheet
and plate steel, and
are formed with the
tightest of tolerances,
improving efficiency of
installation for
commercial steel stair
fabricators.

A common economical stair design for new construction is metal pan stairs with concrete infill. The metal framing is sheet steel with thin sections of concrete placed in the stair treads and landings for the walking surfaces. These thin sections of concrete (usually less than two inches thick) typically do not contain any steel

We offer many types of metal stair pans based on the installation preference. The standard model has steel stair treads and risers that are applied by welding. Another type of stair pan utilizes its steel structure support in combination with concrete to fill the treads to build a strong walkway. For a more flexible profile that requires less
