A diesel mechanic should focus on purchasing books that are printed with his or her nation in mind. In addition to the possibility of finding erroneous information regarding licensing or other regulatory requirements, the design of a domestic diesel engine may differ from that intended for a foreign market.

Diesel Technology, 8th Edition page 1

Diesel exhaust is the gaseous exhaust produced by a diesel type of internal combustion engine, plus any contained particulates. Its composition may vary with the fuel type or rate of consumption, or speed of engine operation (e.g., idling or at speed or under load), and whether the engine is in an on-road vehicle, farm vehicle, locomotive, marine vessel, or stationary generator or other ...
