perfectly complement and enhance other texts from Wiley. Since the third edition of Differential Equations with MATLAB first appeared in 2012, there have been many changes and enhancements to MATLAB and Simulink. These include addition of live scripts, new plotting commands, and major changes to the Symbolic Math Toolbox.

Differential equation or system of equations, specified as a symbolic equation or a vector of symbolic equations. Specify a differential equation by using the `==` operator. If `eqn` is a symbolic expression (without the right side), the solver assumes that the right side is 0, and solves the equation `eqn == 0..` In the equation, represent differentiation by using
