ratio (S/N) of a system. The human ear has a dynamic range of about 120dB from hearing to pain threshold. Studio-grade analog tape recorders achieve 70dB S/N, consumer machines are a lot worse.

## **Audio Engineering in a Nutshell**

Yet, part of the job of a book like this is

# Read Book Digital Audio Engineering An Anthology Computer Music And Digital Audio Series

to challenge you with new, scientific information about how sound works and help you wrap your head around it in practice. And this book does that admirably, covering topics ranging from psychoacoustics, cabling and different signal types, gain staging, and new developments in digital audio production.
