While some people believe that homosexual activity is unnatural, scientific research shows that homosexuality is a normal and natural variation in human sexuality and is not in and of itself a source of negative psychological effects. There is insufficient evidence to support the use of psychological interventions to change sexual orientation.

### **Homosexuality - Wikipedia**

In particular, the description of individuals as homosexual may be offensive, partially because of the negative clinical association of the word stemming from its use in describing same-sex attraction as a pathological state before homosexuality was removed from the American Psychiatric Association's list of mental disorders in 1973.
