Comparing Penile Inversion and Rectosigmoid Vaginoplasty. The goal of Male-to-Female Vaginoplasty is to create a vagina that is functional, feminine looking, with normal voiding function, satisfactory sexual function, and minimal scarring. Ideally, the neovagina should be moist, flexible and hairless, and a minimum of 10 cm in depth and about 3-4 cm in diameter.

Vaginoplasty Techniques: Comparing Penile Inversion and ...

In a German case study, bone loss was reversed in an MTF woman by adding 2 mg of oral estradiol valerate daily to the 100 mg of cyproterone daily she was already taking. She was losing bone mass at the rate of 5% per year while taking androgen-blockers without also taking estrogen (Hierl et al 1999).
