The gas turbine model should be of the type SGT-600, although it is desir- able to improve the existing model of gas turbine type SGT-700. The gas turbine model should be of Mechanical Drive type, and not Power Generation type. This was the natural choice since the control system code developed for the SGT-600 type is of Mechanical Drive type.

Siemens has received its first order from Panama for six SGT-800 gas turbines. The industrial gas turbines, along with a steam turbine, will provide approximately 440 megawatts of electrical power as part of a flexible combined cycle power plant. This could cover the power demand of approximately 1.9 million residents of Panama.
