National Centre of Organic Farming

This is true for food production in general, I think, but "organic" especially conjures images of "letting nature do its work." Your mention of organic farming requiring more manual labor especially interested me because of this - it is discordant with wishful public imagery, bound up in the hope of making more ethical choices.

Organic food is booming, but it's grinding field laborers ...

On an organic farm, each technique would not normally be used on its own. The farmer would use a range of organic methods at the same time to allow them to work together for the maximum benefit.
